### NOTICE

The last edition of this work was published in 1896. So long a time having elapsed since the former edition it has been found very difficult to make this volume as satisfactory as is desirable, though the number of names in this edition is nearly double that of the edition for 1896.

When the compilation of this volume was begun the editor promised himself it should be the last. Owing to the great difficulty in procuring accurate data it may be thought desirable (using this as a sort of first proof) to make another, to be published, possibly, in two years.

It is hoped that those into whose hands this book may fall will assist by sending the editor any information which will be of service in making a more perfect Directory. Changes, errors, additional names and the names of persons deceased will be thankfully received. A copy of this edition will be sent to any one who is in a position to revise any considerable portion of it.

The editor will be pleased to have the assistance of people in any part of the world who will volunteer to furnish data for their own vicinity or country. The great expense of compiling and printing makes it of necessity a labor of love.

SKINS

Oologists throughout the world will please take notice that I am at all times desirous of obtaining birds' eggs in perfect clutches or sets and series of same, also singles where sets cannot be secured, prepared in a scientific manner with one small round hole in the side and accompanied as far is possible with full and complete data, and in the case of very rare or little known species, the skin of one or both parent birds, also nests in perfect preservation.

For above I will pay cash or exchange from my private collection, or if desired will iurnish equipment and supplies.

I desire correspondents in all parts of the world, especially obscure points in South America, Africa, Asia, Australia, Sea Islands, Greenland, Iceland, etc., etc., etc., and beg to say that every communication will be promptly attended to in a thoroughly businesslike manner.

As I wish to handle large quantities of eggs in order to form selected series, I can use any number of any species, but would especially like large lots in such families as Birds of Prey including Vultures, Eagles, Hawkes, Owls, Buzzards, Falcons, Kites, etc., also Goatsuckers, Cranes, Waders, Bustards.
